AUTOMATED REMINDER AND NOTIFICATION SERVICE

Voice broadcasting is a computerized message delivery service that plays your 30 second pre-recorded message on your customer's answering machine, voice mail service, or even to a "live" person -- depending on the voice broadcasting program you choose. The voice on the broadcast message sounds so incredibly real and unscripted; people believe you actually took the time to call them personally!

The reason voice broadcasting is so cost-effective, is that you pay only for successfully left messages. Dependant on your needs, our **Voice Broadcasting Service** can be programmed to automatically search out answering machines and voice mail boxes ONLY, or "live" people ONLY...or even a combination of BOTH. We target your selected database, leaving a powerful personalized message from your company

How does it work?

Automated Reminder & Notification Service allows your staff total control of what numbers get dialed, when they get dialed, while allowing your staff to record and send custom or pre-recorded reminder/notification calls. This is the perfect application for fund raising, event and emergency announcements as well notification calls.

Since there is no hardware or equipment installation required, all jobs are set up by your staff or ours. You have the ability to create jobs (via the internet) or e-mail us with the information and we will be happy to create the job/s for you.

What are the benefits?

- 1- No installation or hardware needed.
- 2- Local and Nationwide 24 Hour, 365 days per year customer support.
- 3- Personalized Web based account management.
- 4- No charge for busy calls or no answers, we only charge for completed calls.
- 5- No commitments or minimums

WE WORK WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
